Quickest assembly time

WARMEST

Unrivalled thermal performance

STRONGEST

Strongest lantern on the market

Draw natural light into your Orangery or Extension with the minimalist Ultrasky lantern.

With less bars than other lanterns, Ultrasky is perfect for extensions and orangeries with a flat roof, ideal for creating a focal point in a dining room, kitchen or living area. The 25° pitch is great for drawing the daylight in to the room and the super-strong ridge means there are less bars for a stunning, stylish space, perfect in every way.

Ultrasky's incredible structural strength delivers spans up to 4M x 5.85M and uses fewer bars than any other lantern. Available in uPVC and Aluminium and any colour, Ultrasky lantern works with any budget and any design.

The Ultrasky lantern is thermally broken inside and out, and this combined with its unique storm shield protection system means total peace of mind when it comes to risk of leaks or condensation.

Whatever style of property you own, the Ultrasky lantern roof will enhance it – meaning you'll be able to create a traditional or modern build. Your new room will look exactly the way you had envisioned it and improve your home's market appeal and value.

It is Ultraframe's policy to continually seek to improve it's products, processes and service and we reserve the right to change specifications without prior notice. We have been trading for nearly 35 years and strive to deliver unrivalled quality and service.
