

UDesign Release Notes April 2021

This UDesign update contains further enhancements to the software and the communicated price increase, see below: -

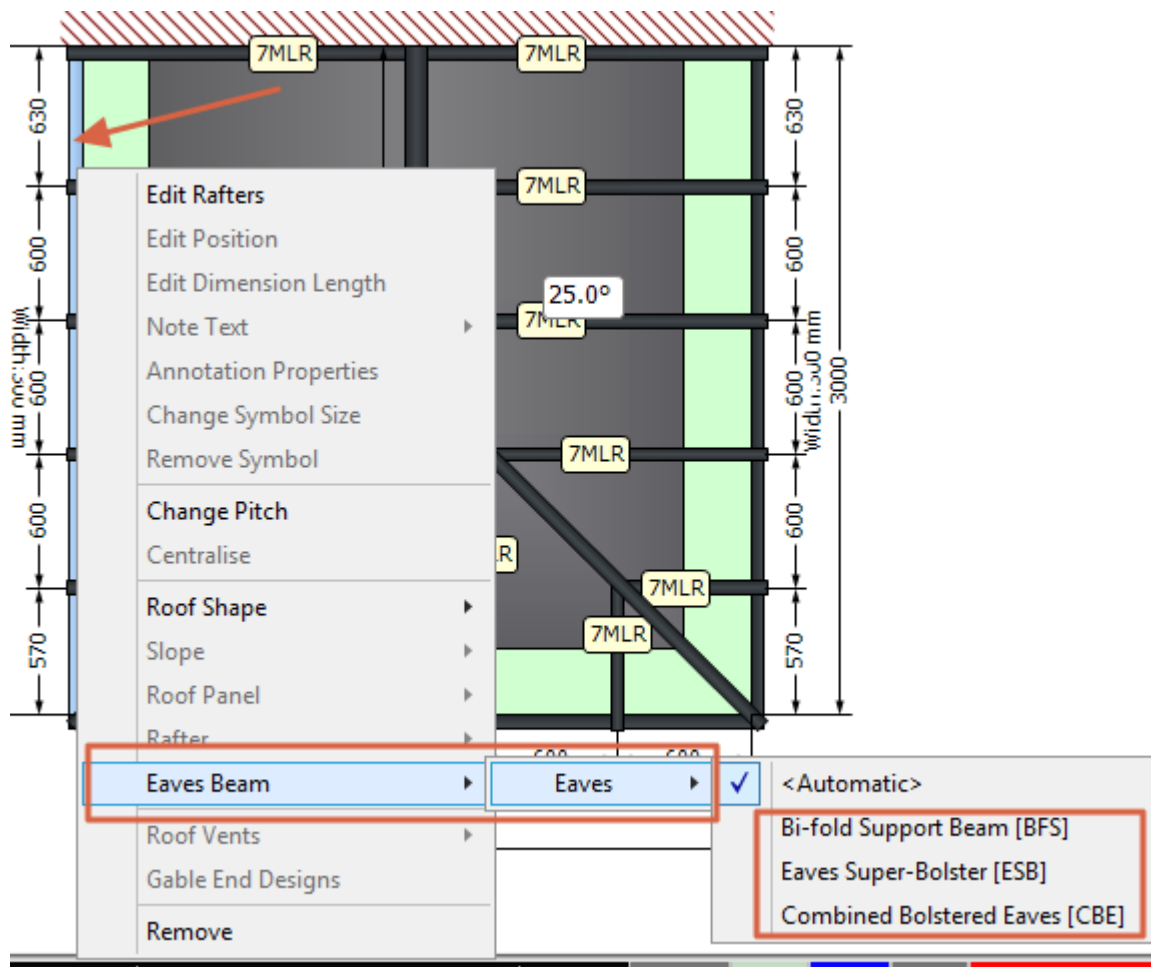

Price Increase

New sell prices will now be output as per previous communications. These prices will take effect from the 5th of April.

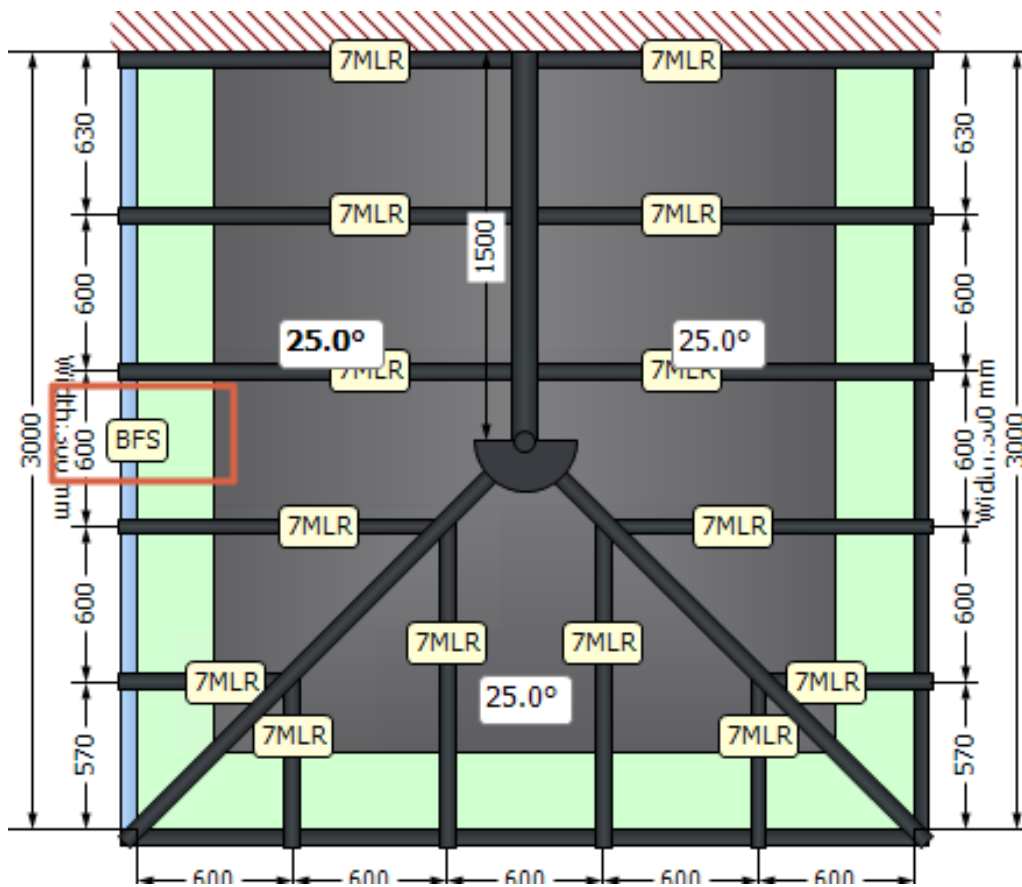

Livinroof - Bi-Fold & Eaves Bolster Options

Livinroof now contains the Bi-Fold & Eaves Bolster options, you need to specify these options in the Roof tab on an Eaves-by-Eaves basis

Right click on the Eaves Beam and go to Eaves Beam > Eaves and select the required option.

A label for the option you have chosen will then appear on the drawing

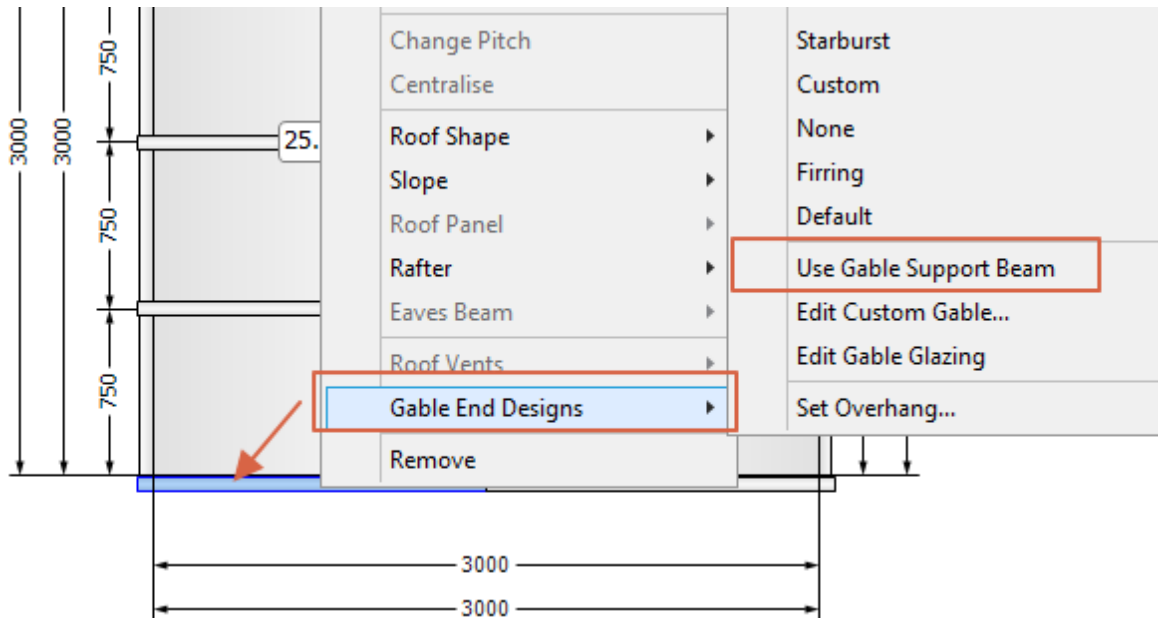

Please pay attention to any new Errors/Warnings in the system.

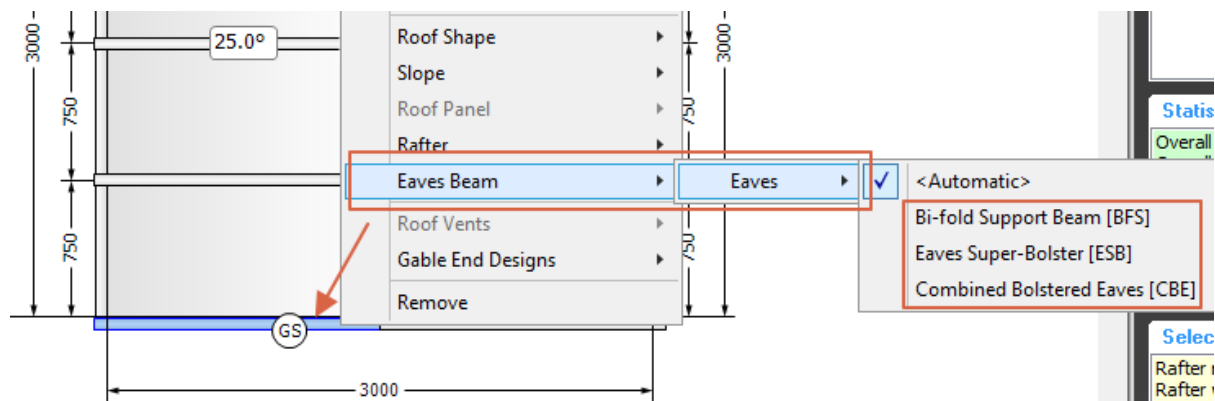

If you have any questions regarding these new options, please call Customer First or our Technical Team.

Gable Reinforcement Options

You can now specify the Bi-Fold & Eaves Bolster options on the Gable once the Gable Support (GS) has been applied. You can see below that Eaves Beam is greyed out.

Once the GS has been applied you can then use the SDG to fix or you can apply manually by right clicking on the Gable End and then use the Eaves Beam menu.

Again, if you have any questions regarding these new options, please call Customer First or our Technical Team.

Specifying the Bi-Fold & Eaves Bolster Options

The specifying of the Bi-Fold & Eaves Bolster options has now been filtered, so that they can only be specified in the Roof tab and no longer appear in Order Details.

Glazing is now available

The following glazing types were temporarily unavailable. These are now available for again in the system: -

SMG Ultimate Blue
SMG Ultra86 Blue
Celsius One
Celsius Elite

BG Adaptors phased out

The following BG adaptors are being phased out and being replaced by: -
