

Extend your home with hup!

Create beautiful, bright living spaces with minimal disruption.

Looking to extend your home because...

- You want to add value to your property.
- You want to adapt your home to suit your lifestyle.
- You like the idea of broken-plan living – divide your home into zones.
- You'd prefer to avoid the hassle and cost of moving.

Looking to transform your conservatory because...

- You're currently using it for storage / a dumping ground.
- You want to make use of the space all-year-round.
- You like the idea of a useable space such as a home office or tv room.
- You'd like to increase the energy efficiency, without compromising the natural light.
- You'd like the space to work harder in terms of bringing the outside in.

Looking to build a Garden Home because...

- You'd like to add value to your property.
- You'd like to extend your living space – for older or younger family generations!
- You'd prefer to avoid the hassle and cost of moving.
- You'd like to transform your garden.

You have some concerns...

- You think you need an architect to create your design / dream but find the prospect of that overwhelming.
- You're worried about costs spiralling out of control.
- You Keep putting it off as the mess and disruption isn't conducive to life right now.
- You don't know where to start in terms of liaising with various tradesmen to pull this project together.
- You think it will take too long to build and its time you don't have...

hup! is the answer with a better way to plan...

One supplier, one project

- Your hup! Build Team will manage your project from start to finish – no need for an architect.
- Your price will not fluctuate.
- Confidence that your project will be delivered on time and on budget.

Ultimate design flexibility

- Compatible with five Ultraframe roofing systems.
- Windows and doors wherever you desire.
- Total design freedom.

hup! is the answer with a better way to build...

Five times faster to build

- What would typically take months to build will now only take weeks, or even days.
- Delivered as a flat pack kit, so no cutting on site.
- Less mess and disruption to your home.

High quality finish every time

- A high-quality finish assured every time.
- Designed by Ultraframe – a UK leader in extension and roofing technology.
- Manufactured in a BBA approved factory.
- Features patented Ultrapanel technology.

hup! is the answer with a better way to live...

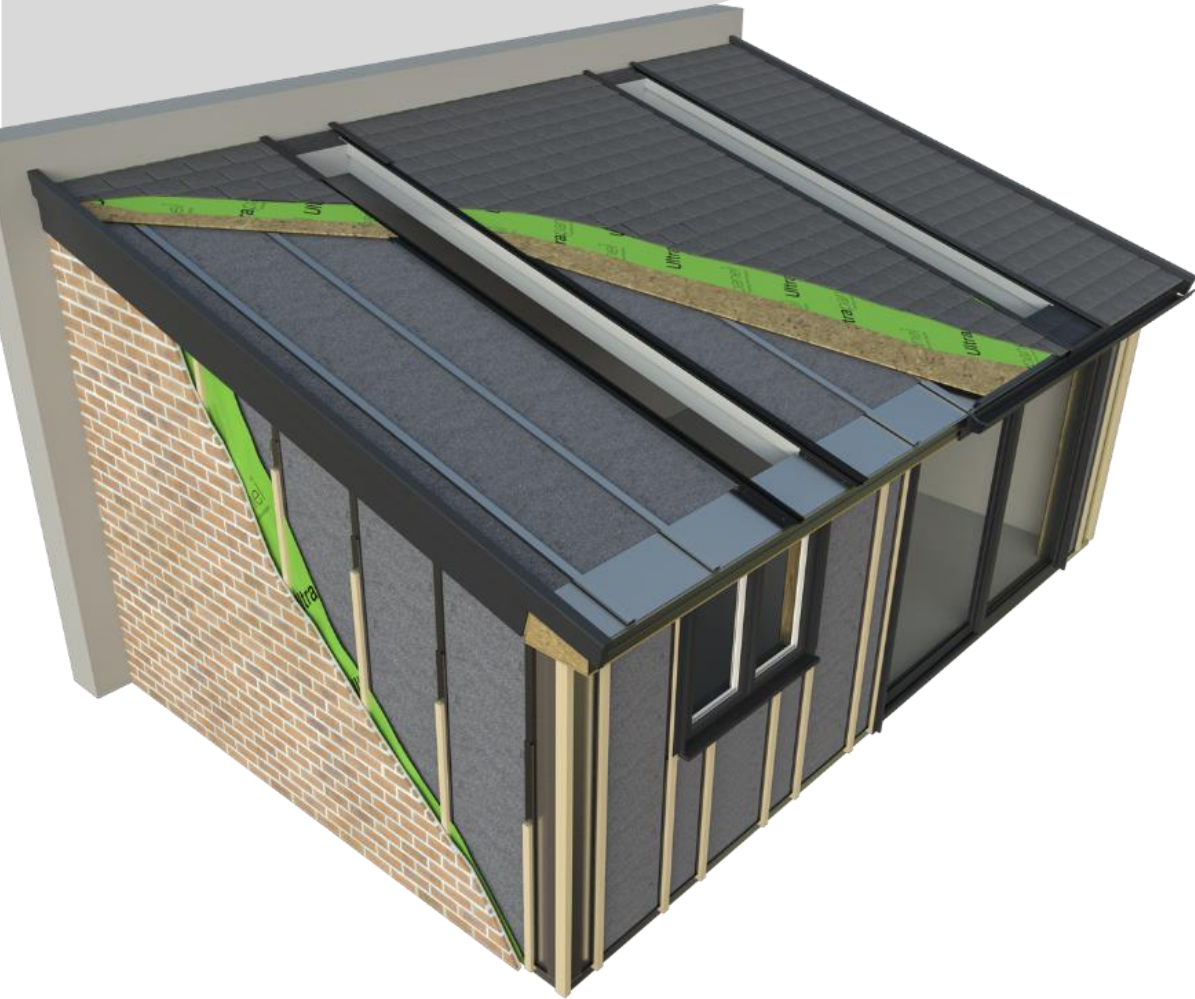

Five times more energy efficient than the average UK home

- No more headaches over rising energy costs.
- High performance glass and low U-values create a space that's flooded with natural light and at the right temperature, all year round.
- A welcoming and comfortable space that you can live in and enjoy all year round.

hup! technology

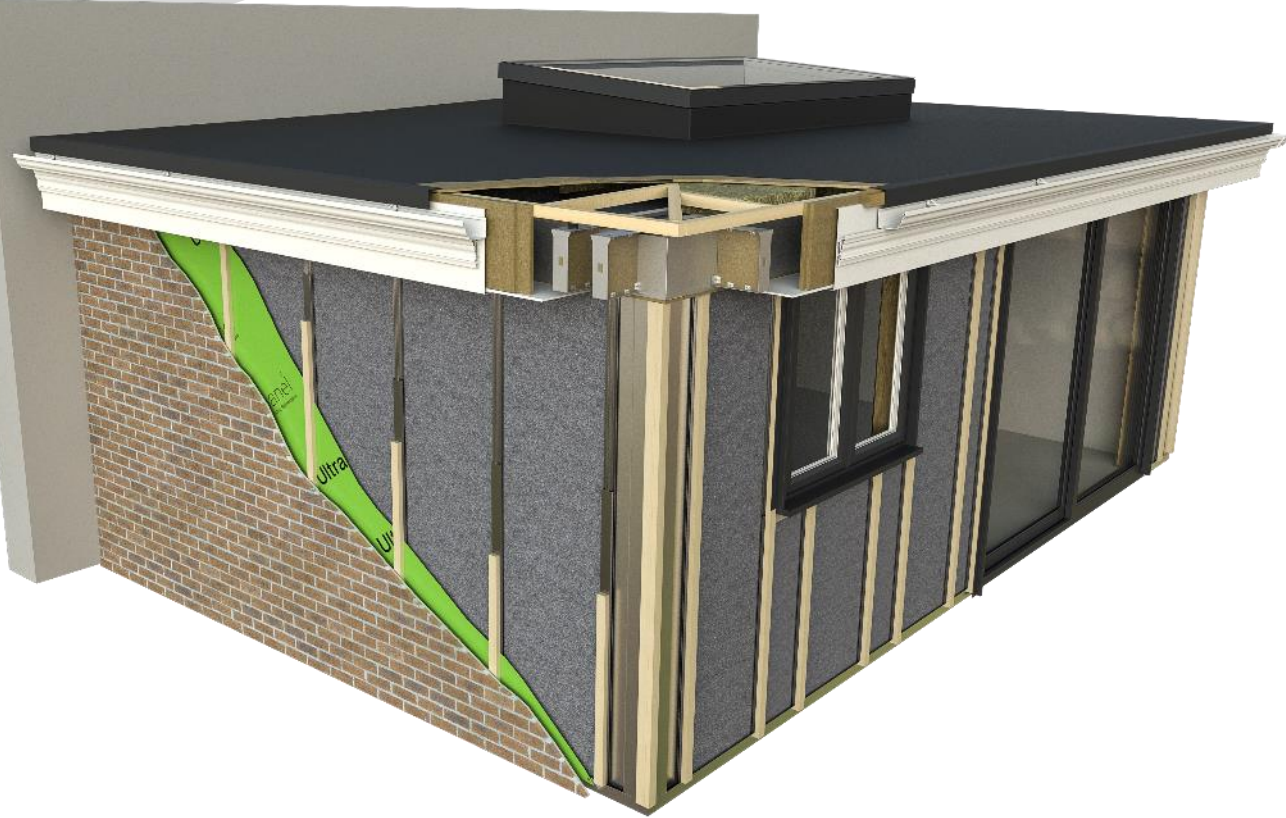

Patented Ultrapanel Technology

- Groundbreaking technology combines the best of both timber and steel.
- U-Values of between **0.12** and **0.17** that significantly **exceed Building Regulations**.
- A hup! extension is **five times more** energy efficient than the average UK home.

Super-Strong I-Beam Structure

- hup! wall panels significantly **outperform traditional building methods** in terms of strength.
- Panels rapidly click together to form a **super-strong i-beam structure** throughout your hup!.

Rapid Connection Details

- hup!'s **millimetre precision** engineering and patented wall and roof connections ensure a perfect build with **no cold spots**.
- The rapid clip-fit nature of these clever connections across the roof and walls mean that a hup! extension is built **five times faster** than a traditional build.

Building with hup! is easy

hup!

Footprint

Contact your local builder (done!) and choose the shape and size of your extension.

two

Windows & Doors

Select the windows and doors for your design.

three

Roof

Choose from dramatic high pitched ceilings, or the understated look of flat or lean-to designs.

four

Wall Finish

Choose a brick finish for a more traditional look, or render or timber for a more contemporary look.

Stress free building!

The end result is...

A conservatory transformation that's energy efficient and now feels like part of the home.

The end result is...

An extension that's been built five times faster than if using traditional methods.

A bright sociable open-plan space – or whatever your dream of it to be!

Plus...

- Lower energy bills
- Less hassle
- Built in weeks as opposed to months
- In a design chosen by YOU
- High quality finish

Why wait?
