

Roof Vent

Ultraframe[®]
Transforming light and space

New improved roof vent

The Ultraframe roof vent offers a striking contemporary look and its design is thermally broken offering a host of performance benefits.

- Modern, slimline look
- Aluminium sash as standard
- Long lasting durable
- PVCu welded frame to eliminate leaks
- Better gaskets
- Thermally broken
- Any colour or foil
- Available with manual or electric openers
- Optional aluminium internal claddings
- Dry fit product

Roof vent options

A wide range of options are available to personalise the roof vent, ensuring that it perfectly complements any conservatory.

Colours

The Ultraframe vent is available in the colourways below as standard stock items and also available in any RAL or special colour as a bespoke item.

Please specify the colours of the frames and sash when ordering the roof vent.

Minimum size of vent 500mm x 500mm, Maximum size of vent 1100mm x 1100mm.
Glazing in vent 24mm.

All prices plus VAT and carriage

Glass rules - (Calculations for above and below roof vent)

Upper glass unit height =

Vent position from upper edge of glass - 10mm.

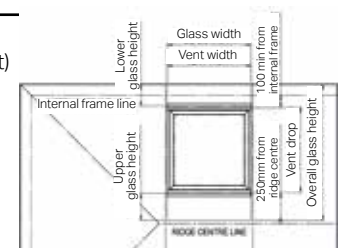

Lower glass unit height =

Overall glass height - upper glass height - vent drop - 20mm.

Vent positioning (measured up the roof pitch)

Minimum of 250mm from ridge centreline

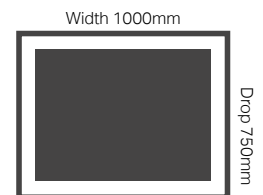

Minimum of 100mm from internal frame line

How to measure sash glass

To calculate the glass size within the vent there is a 76mm reduction on the total width and 78mm reduction on the total drop. So in example to the right the glass would measure 924mm x 672mm.

(We recommend that glass is ordered 'without edge tape' as this increases the thickness of the unit and can make it more difficult to fit the unit into the sash frame.)

Ancillary pricing

Ultraframe roof vents can be opened manually or electrically. There are a number of product options for the 2 opening solutions which are detailed below.

Digital Thermostat & Rain Sensor
